

Siv851 Sep 29.

Summary of earlier discussion:

- 1) Unique id in council
- 2) Linking sites can facilitate superior analytics and service delivery - targeting, compliance, ...
- 3) Strong case for a global id.

What exactly does Aadhaar provide?

- 1) Understand the Aadhaar federated model:

CIDR, AVAs and ASAC (private connectivity).  
de-dup architecture

authentication modalities - demographic, OTP, biometric, multi-modal.

Payment architectures:

APB for DBT.

AEPS

See

<https://authportal.uidai.gov.in/web/uidai/home-articles?urlTitle=authentication-overview&pageType=authentication>

- 2) Read about other ID schemes. See

<https://sites.sph.harvard.edu/nidc/location/conferencematerials/>

Find other resources | Do a search, important

- 3) Prepare and submit a write up on similarities and differences in the 'identity' defined by

a) IITD id card

b) PAN or voter id card

c) Passport d) US SSN e) Aadhaar

Indicate what 'identity theft' may mean in each context.

PTO

In the next class we will discuss

- a) Jean Dreize and Reetika Khera's critiques on Adhvaar from privacy and civil liberty points of view.
- b) Try to understand what exactly are the risks and what exactly needs to be protected.
- c) Discuss questions/doubts on Adhvaar architecture.

Pls come prepared.
