

Call for Workshop and Tutorial Proposals

Tutorials

February 19, 2008

Last date for receiving proposals: Sept 30, 2007

Tutorials aim to provide participants with an opportunity gain a quick insight and understanding of area. We are planning to have about 4 to 6 half-day (3-hour) tutorials. The topics can be from a wide range from practical techniques, surveys, theoretical issues to guidelines and standards. Tutorials should be of educational value and no commercial and sales oriented presentations will be accepted.

A two page summary of the accepted tutorial will be published in the conference proceedings.

Local hospitality and free registration to the conference will be provided for the tutorial presenters. Partial travel support/honorarium may be available depending on the registration.

The proposal should give the following information

- Title of the Tutorial
- Presenter(s), Name, Affiliation, Qualifications and Experience
- Tutorial Topic Description
- Intended Audience
- Importance and Relevance to the Software Engineering Community

Workshops

February 22, 2008

Last date for receiving proposals: Sept 30, 2007

The ISEC workshops provide an opportunity to exchange information in emerging areas of software engineering and practice. We are planning to hold 2-3 one day workshops. Workshop proceedings will be published separately.

Local hospitality and free registration to the conference will be provided for the workshop organizers. Partial travel support may be available depending on the registration.

The proposal should give the following information

- Title of the Workshop
- Organiser(s), Name, Affiliation, Qualifications and Experience in organizing conferences and workshops
- List of Workshop program committee members
- Workshop Description outlining the theme and goals
- Desired minimum and maximum number of participants

The proposals may be sent to:
